- (n) During the period there were 36 temperature elesses on distance abjects presented to the personnel of the Eath Main.
- (b) During the period 797 personnel failierized with their went no, the 6-60 Eaching Cun and 8-79 Grandes Laureber.
- (c) On 19 December GW3 Trotter, but which haintenance.
 Officer attached a training class on Defensive Driving at Sagar Support
 Gorman. In refer to ansure all personnel assigned to the battalion
 receive the require training on defensive driving, a three bour block
 of instruction on defensive driving is being conducted by GW3 Trotter
 each Thursday.
- (d) On 6 January 1970, 216 personnel from the bat alient and BBC, 29th Group participated in a night fire training exercise.

(9) (i) Logistics

- (1) During the reporting partial, the long bink rest Planting Beard approved the location of a 26,000 mark foot extension to the cast of the present QL 15 POL retail point. This request was approved as a temperary means of reducing the fire hazards factured by providing a securate Pol Facility for track I vehicles. The body requested the bettalion consider relocating the Pol Feint due to its present close proximity to Sanford Army Airfield. The bettalion is locking into the feasibility of relocating from the present location and evaluating possible new site locations.
- (b) on 30 December the bettalion requested reproval for the utilization of Sector new 870 in the old 505th Deput Class I was, as the reader storage area for the Class I parations of the 506th Sup & Sec Congres, in not adequate. On 6 January the reader area was transferred to the 506th Sup & Sec Congres, giving the Class I raint badly as ted additional reafer storage space.
- (c) The long Binh Fest Planning board approved the request for obtaining a portion of the old arry Done. Long Binh, Class I Meeter area to enable relection of the laurery, a Johnus been submitted and approved to take necessary alterations to the arms. After completion of the requirements of this JCR, the laurery will be relocated.

2. Jacobs Language Gomes where Observation Fundamental Augustions

- A. Personnels wine
- b. Intelligences None
- c. Garations:
 - (1) (1) Bak_re
- (a) OBSERVATION: This headquarters was noticing a general deterioration of sanitation and maintenance levels of the bakery operating areas and equipment. Emphasis was placed on the unit to correct these conditions; however, results were less than catisfactory.
- (b) EVALUATION: Since the bakery has been operating greatly univertenath, just of the manpower available was devoted strictly to production of bread to support 120,000 troops throughout the III CTZ. To insure that proper clean-up and mintenance was performed, rescheduling of production had to be recommished.
- (c) RECOMENDATION: To accomplish the requirements for raintenance and improved senitation, it was recommended the belowy be closed during the 28 day cyclic master norm period, once every LA days. This was no proved in January 1970. During the 12 hour chut down period, performance of all necessary statistion and minimum requirements is accomplished by the personnel normally working on shift, break and multi mix is issued to local units in liou of freshbreak. The shut-down period does not affect shipment of break to field units.

(2) (3) Handre

- (a) CBSERVLTION: Many complaints have been received by this headquarters a nearming stains and sail spots of flaturare laundered by the ACBrd Fld Sve Grapuny.
- (b) IVALUATIONS a rigorous program was initiated by the laundry to find a method of removing the stains by enriching the laundry formula currently in use. After many test laundry batches were processed, the stains were still present. An alternative method to this problem had to be found.
- (c) MECOLIZIDATION: Since the stains cannot be removed, this hemiquerters has recommended all flatures laundered by the 403rd be dyed your a in order to make the stains less noticeable. The actual dyeing of the phoets and pillowerses can be done in the same kine the items are routinely laundered at the 403rd Fld Sec G. Recommendation

has been approved on a trial basis for 10% sheater.

(3) (v) Clandre of Gall Stormer routers

- (a) Gesavalidis Existing notions if elemany irrorational roll we will an existing supported to be closed however, to declore still remained.
- (b) EVALUATION: It was discovered what a thorough cleaning using a solution of calcium hypechloride most untur twice weakly resulted in a clean reafer without unpleasant edges.
- (e) RECOMEDATION: That all fragen food reafers to cleans i twice weakly with a solution of calcium hypochloride and water.

(4) (0) We of Sanctand Vans

- (a) WesaVATICH: Fruits and veget bles promise in the depublic of Victima often arrive at the Class I in our condition. They are delivered by leadly owned, non-refrigerated vehicles.
- (b) SVALUTION: Through the use of Sea-Land vans, large amounts of produce could be shipped at one time on could be issued from taking to to tail gate. This would call to be in the large of refrigeration and storage sines the bea-land vans or equipment with refragaration units.
- (c) NEGO: Filbation That, who never a smiller Scale and vans in used for shipment of perishable fruits and value of the largest Aroney sould consultante a interest in School for further shipment to Class I points.

(5) (U) Lint rance Tim C. P. 350 GFM From 2

- (a) CESE-VITION: Due to the mission of the May 15 for service stati n, it is necessary to courate the 350 GPL parce continuously, twenty-four hours a day to radictain mass are in distribution lines in order to dispusse fact. This leaves no time for normal lubrication and adintenance on pumps.
- (b) EVALUATIONS an absysted 600 gall n tank was installed on the distribution lines and kept filles. During periods of light traffic, vehicles are refueled for only in a the 600 gallon tanks. As a result, the pumps can new be abut from and anintenance performed at recommended intervals. This has regulted in a degrees in mechanical failures of the sunge.
- (c) .ECOLED.TICH: that units specifical vehicle refueling stations on a tuenty-four hour basis insufficient interpretation

Commanding General, 1st Logistical Command, ATTH: AVCA CO-4H JPG 963R4

- 1. (U) Reference paragraph 2c(2), page 12. COMCUR. Sheets dyed green would make stains less noticeable. However, dyed sheets should be issued from the supply system and not dyed locally.
- 4. (U) Reference paragraph 2c(4), page 13. FONCONCUR. The Sea-Land contract provides that want must be returned to port 15 days after dispatch. It also provides that wans can be utilized for additional items, but must contain part of the original cargo. The additional cost incurred in the reloading of goods and operation of the reefer units would make Sea-Land vane uneconomical. The resion units on the vans are operated by propane gas or electrical current. Propane gas cylinders normally last only 8 (eight) hours and are quite expensive. Electrical outlets at Class I points are scarce. Since locally-procured FF&V rarely requires immediate refrigeration, reefer wans are not required for delivery. Once goods are refrigerated, refrigeration is required continuously, or goods will deteriorate much more rapidly when removed from refrigeration.
- 3. (U) Lessons Learned, observations, and recommendations are concurred in by this command with the above exception.

- TO: Commanding General, United States Army, Vietnam, ATTE: AVHSG-DST, APO 96375
- 1. The Operational Report Lessons Learned submitted by Headquarters, 266th Supply and Service Settalion for the quarterly period ending 31 January 1970 is forwarded.

2. Pertinent comments follow:

- a. Reference item concerning laundry, page 12, paragraph 2e(2). Concur. Renconcur with 2d indersement. Sheets can be dyel at field laundry locations on a regular basis. To require the supply system to provide green sheets would require action to CONUS since there are no green sheets stocked in country for regular use by field units. To order from CONUS would require at least six months to receive these items. The sheets may be does in field locations utilizing one extra laundry machine cycle. The test of dyeing 100 sheets should be conducted at the field laundry. If successful, due will be ordered and sheets dued during routine laundry operations, not issued through the supply system.
- b. Reference item concerning cleaning of cold storage reefers, page 13, paragraph 2c(3). Concur. When the calcium hypochlorile and water solution is used as a disinfectant, it should contain 10 parts per million of free chlorine. Concur with cleaning reefer twice weekly if time and space available, however, it is not a necessity.
- c. Reference item concerning use of Sea-Land vans, page 13, paragraph 2c(4). Concur with paragraph 2 of 2d indorsement.
- d. Reference item concerning maintenance time for 350 GFM pumps, page 13, paragraph 2c(5). Concur. Action has been initiated by this headquarters to install fuel dispensing pumps at most SUPCOM locations that have a mission of refueling individual vehicles. Additionally, 250 bbl bolted steel tanks are available for fuel storage at refueling stations and can be constructed so positive suction pressure or gravity systems can be used. The theater-wide short supply of 600 gallon tanks precludes its use as a static storage tank. Planned installation of the service station pumps and appropriate storage tanks will eliminate the use of TOE POL pumps at most fixed refueling locations.

- TO: Commander in dittef, United States Army, Pacific, ATTS: CPUT-DT, ATO 96558
- 1. This headquarters has reviewed the Greentienal deport-Lessons Learned for the quarterly period ending 31 January 1970 from headquarters, 256th Supply and Service Sattalion (AS) and concurs with the comments of indersing headquarters.
- 2. Reference item concerning "Laundry", page 12, purgraph 2a: nonconcur. Waching formulas prescribed by Th. 10-3510-201-12 and th. 10-354 have been tested and proven to be adequate to produce a sunitary finished product. Extra time required to dye sheets and pilloweases would increase contract laundry requirements by slowing production of field laundry operations.

 Dying shoets green would cause a likely mixture of hospital and troop work. Bye will eventually fade; thus the present cituation will still exist. Bye is another added expense to an operation that is presently too expensive. The Commanding Officer of the 453d Field Service Company has been advised to prepare an information letter to his customers explaining the laterite stains, attempts to remove them, and that the manifation of the laterite stains, attempts to remove them, and that the manifation of the laterite
